Satellite DC Charger

Flexibility Output Power: Easily scale to 960 kW with 2 480 kW cabinets in series

- 6-12 pcs 40kW power modules per Power Unit cabinet
- One Power Unit can support up to 6 single air-cooling dispensers simultaneously
- Two single dispensers can be combined into a dual dispenser
- Any two or three single air-cooling dispensers can be combined into one liquid-cooling dispenser for enhanced performance

Flexible expansion with additional power modules for installment investment

- Start with a minimum power unit and gradually expand by adding modules before increasing the number of units
- Each power unit can have a variable number of power modules and dispensers
- Reserve space and wiring during installation to facilitate future power unit and dispenser expansion with minimal effort

Eco-friendly with Solar & Battery systems

- Dynamic pricing strategy support
- Storing energy for use and keep devices running without interruption
- Flexible power expansion with ESS and Solar
- Intelligent energy management system

Secure Encrypted Communication (TLS Mutual Authentication)

- The system implements fully encrypted communication based on TLS (Transport Layer Security), ensuring all transmitted data is protected against leakage and tampering. It supports 'mutual authentication', verifying both communication parties to guarantee a trusted, end-to-end secure connection.

2026.7.30 V1.7

Smart Priority Charging

Level 1, Temporary Control Mode

Applied during special operational needs such as demand response events, peak-time load management, or grid emergencies, where charging power may be reduced or redistributed.

Level 2, Guest / Unregistered Users

Non-registered users have the lowest regular priority, but are guaranteed a minimum charging power to complete their charging needs.

Level 3, Registered Standard Users

Regular registered users have higher priority than unregistered users, ensuring better charging performance in most cases.

Level 4, VIP Members (High Priority without Boost)

VIP users receive high charging priority even without a boost purchase, typically ahead of standard registered users.

Level 5, Boost Access (Temporary Paid Priority)

Users who temporarily pay for a boost get the highest charging priority, ensuring maximum available power allocation during their session.

Scenario 1	800/960kW			400kW	400kW
				Registered	Guest
Scenario 2	960/960kW		400kW	360kW	200kW

Safety standards	EN IEC 61851-1 EN IEC 61851-23
Certification	EN 61000-6 Series EN IEC 61851-21-2 EN 301 489-1/-52 EN 301908-1/-13 EN 62311 LTE 8 Band

1600kW High-Power Integrated Matrix

Featuring an industry-leading 1600kW single-chassis integrated design, our system eliminates the efficiency loss of traditional fragmented units. As the "Super Energy Heart" of the station, it delivers extreme power density for heavy-duty trucking, mega-hubs, and highway corridors.

Independent Air-duct Cooling & Maintenance-Free

Equipped with IP65-rated independent air-duct modules, ensuring total physical isolation between core electronics and cooling airflow. This effectively eliminates erosion from dust, salt spray, and humidity, doubling the system lifespan and reducing on-site maintenance to near zero.

Smart 5-Level Priority Power Allocation

Proprietary algorithm-driven 5-level prioritization. From grid-demand response to paid "Boost" access, operators can monetize power like a premium commodity, assigning higher priorities to VIPs to maximize ROI.

- Level 1, Temporary Control Mode
  Applied during special operational needs such as demand response events, peak-time load management, or grid emergencies, where charging power may be reduced or redistributed.

- Level 2, Guest / Unregistered Users
  Non-registered users have the lowest regular priority, but are guaranteed a minimum charging power to complete their charging needs.

- Level 3, Registered Standard Users
  Regular registered users have higher priority than unregistered users, ensuring better charging performance in most cases.

- Level 4, VIP Members (High Priority without Boost)
  VIP users receive high charging priority even without a boost purchase, typically ahead of standard registered users.

- Level 5, Boost Access (Temporary Paid Priority)
  Users who temporarily pay for a boost get the highest charging priority, ensuring maximum available power allocation during their session

Flexible Terminal Configurations

Charging terminals support various specifications: 250A, 400A, 500A, 600A, and 1000A. Operators can flexibly mix and match these based on vehicle types to achieve the perfect balance between asset utilization and charging efficiency.

Functionality & Scalability via MQTT

Replacing legacy low-speed CAN-bus with the MQTT protocol. Its lightweight, high-bandwidth nature enables millisecond-level data sync, significantly enhancing real-time monitoring and providing limitless scalability for EMS and cloud platform integration.

Banking-Grade Security with TLS

The system implements end-to-end encrypted communication based on TLS 1.3 with Mutual Authentication, ensuring that charging commands, user privacy, and transaction data are immune to tampering or eavesdropping in any network environment.

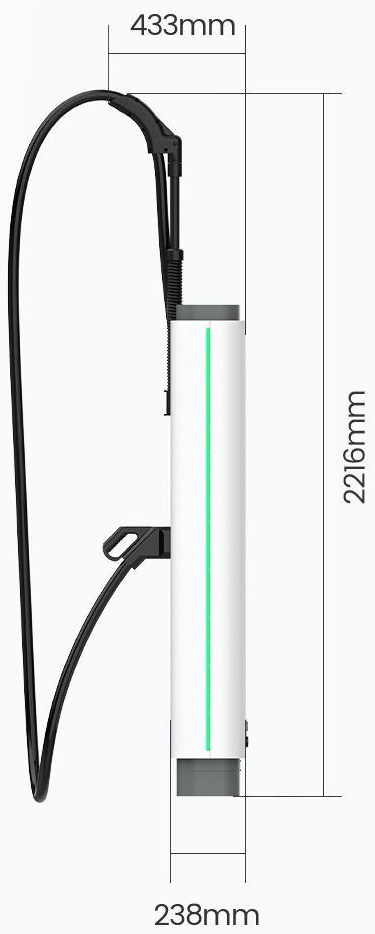
Standard Compliance: ISO 15118-20

Fully compliant with OCPP 2.0.1 and the cutting-edge ISO15118-20 standard. Supporting Plug&Charge, it ensures seamless, long-term interoperability with global leading EV brands and next-generation models.

Terminal-Wide Proactive Safety Protection

The dispenser features a proactive safety array with high-precision thermal sensors embedded from the connector to the terminals. Combined with millisecond-level shut-off capability, it ensures absolute safety for vehicles and users during high-power sessions.

Air Cooling Dispenser

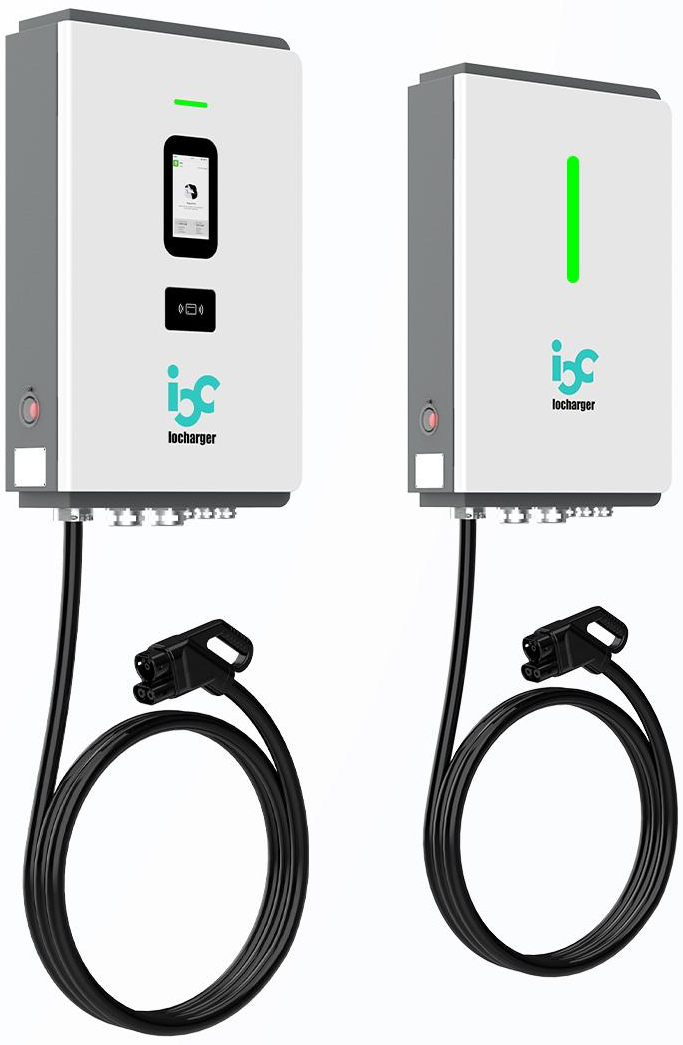


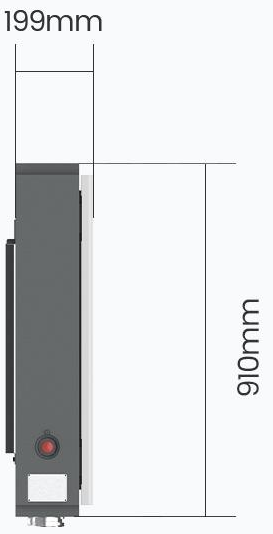
Specification

Specifications are subject to change without notice.

DC Output Connection	Air Cooling Dispenser
Charging mode	Mode 4: CCS2
Output power	400kW, 375kW, 250kW (Optional)
Output voltage	150-1000V
Output current	CCS2 250A/ 375A/ 400A, CCS1 200A/ 300A
Charging interface	**CCS2, or CCS1, or GB/T, or CHAdeMO**
General Characteristics	**400kW, 375kW, 250kW (Air cooling) (Optional)**
Enclosure rating	IP55
Operating altitude	≤2000m
Operating temperature range	-30℃ ~ +55℃
Storage temperature range	-30℃ ~ +80℃
Mounting	Floor Standing
Dimensions (H×W×D)mm	2216 x 468 x 433 (With CMS)
Screen type	7 inch LCD Touch Screen
Cable length	5m
Status indication	LED/LCD/APP
User interface	iocharger APP
Connectivity	Ethernet
Protocols	OCPP 1.6J & OCPP 2.0.1 Full support, GB/T 27930, CHAdeMO 2.0, ISO15118 (PnC & EIM), DIN70121
User authentification	APP, RFID card, QR code, Credit Card (Optional)
Software Update	OTA updates via web portal
Shipping weight	120kg(CCS2 250A 5m), 127kg(CCS2 400A 5m)
Safety standards	**EN IEC 61851-1, EN IEC 61851-23**
Certifications	EN 61000-6 Series, EN IEC 61851-21-2, EN 301 489-1/-3, EN 300 330, EN 62479 RFID

Air Cooling Wall-mounted Dispenser



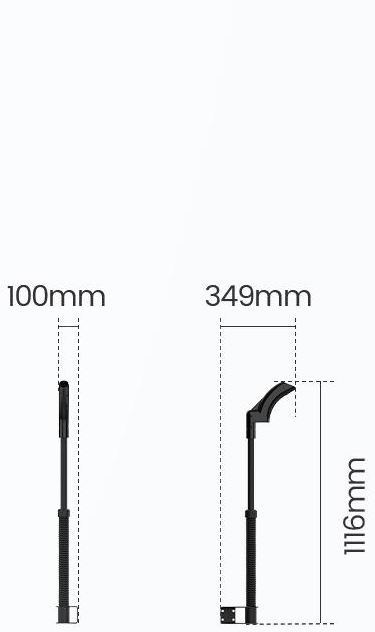


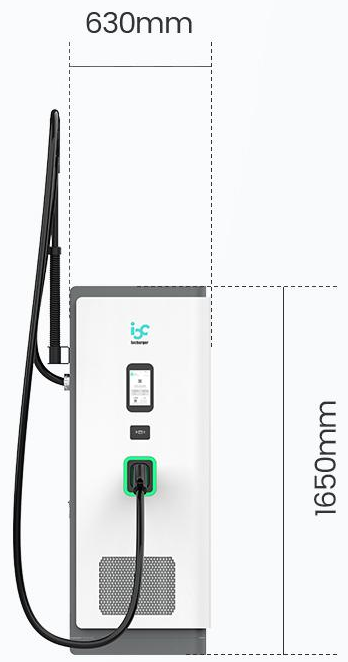
Specification

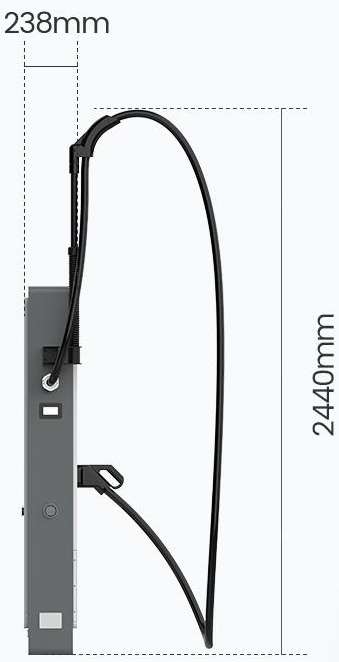
Specifications are subject to change without notice.

DC Output Connection	**Air Cooling Dispenser**
Charging mode	Mode 4: CCS2
Output power	400kW, 375kW, 250kW（Optional）
Output voltage	150-1000V
Output current	CCS2 250A/ 375A/ 400A, CCS1 200A/ 300A
Charging interface	**CCS2, or CCS1, or GB/T, or CHAdeMO**
General Characteristics	**400kW, 375kW, 250kW（Air cooling）(Optional)**
Enclosure rating	IP55
Operating altitude	≤2000m
Operating temperature range	-30℃ ~ +55℃
Storage temperature range	-30℃ ~ +80℃
Mounting	Wall-mounted
Dimensions（H×W×D）mm	910 x 558 x 199
Screen type	7 inch LCD Touch Screen
Cable length	5m
Status indication	LED/LCD/APP
User interface	iocharger APP
Connectivity	Ethernet
Protocols	OCPP 1.6J & OCPP 2.0.1 Full support, GB/T 27930, CHAdeMO 2.0, ISO15118（PnC & EIM）, DIN70121
User authentification	APP, RFID card, QR code
Software Update	OTA updates via web portal
Safety standards	**EN IEC 61851-1, EN IEC 61851-23**
Certifications	EN 61000-6 Series, EN IEC 61851-21-2, EN 301 489-1/-3, EN 300 330, EN 62479 RFID

Liquid Cooling Dispenser





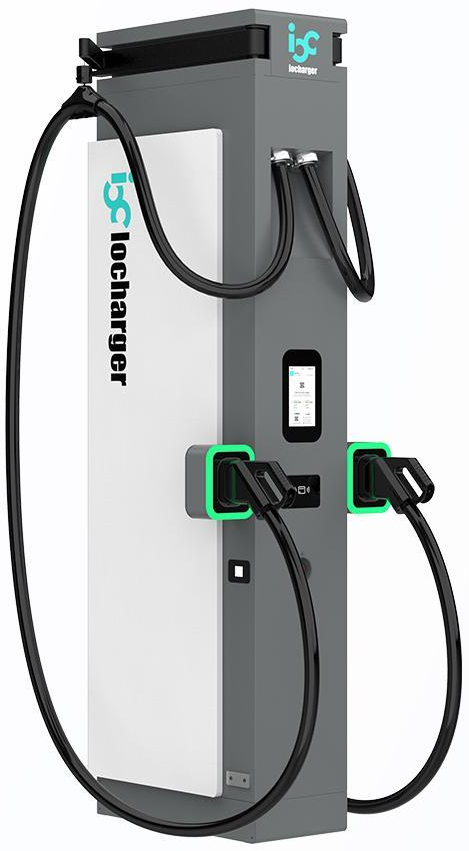


Specification

Specifications are subject to change without notice.

DC Output Connection	**Liquid Cooling Dispenser**
Charging mode	Mode 4: CCS2
Output power	500kW（Max 600kW）
Output voltage	150-1000V
Output current	CCS2 500A（Max. 600A）
Charging interface	**CCS2**
General Characteristics	**500kW (Liquid cooling)**
Enclosure rating	IP55
Operating altitude	≤2000m
Operating temperature range	-30℃ ~ +55℃
Storage temperature range	-30℃ ~ +80℃
Mounting	Floor Standing
Dimensions（H×W×D)mm	1650 x 630 x 238（Without CMS）
Screen type	7 inch LCD Touch Screen
Cable length	5m
Status indication	LED/LCD/APP
User interface	iocharger APP
Connectivity	Ethernet
Protocols	OCPP 1.6J & OCPP 2.0.1 Full support, GB/T 27930, CHAdeMO 2.0, ISO15118（PnC & EIM), DIN70121
User authentification	APP, RFID card, QR code, Credit Card（Optional）
Software Update	OTA updates via web portal
Shipping weight	158kg
Safety standards	**EN IEC 61851-1, EN IEC 61851-23**
Certifications	EN 61000-6 Series, EN IEC 61851-21-2, EN 301 489-1/-3, EN 300 330, EN 62479 RFID

Air Cooling Dual Dispenser



Specification

Specifications are subject to change without notice.

DC Output Connection	**Air Cooling Dual Dispenser**
Charging mode	Mode 4: CCS2
Output1 power	400kW, 375kW, 250kW (Optional)+400kW, 375kW, 250kW (Optional)
Output1 voltage	150-1000V
Output1 current	CCS2 250A/ 375A/ 400A, CCS1 200A/ 300A
Output2 power	400kW, 375kW, 250kW (Optional)
Output2 voltage	150-1000V
Output2 current	CCS2 400A , 375A, 250A (Optional)
Charging interface	**2*CCS2, 1*CCS2+1*GB/T, or 1*CCS2+1*CHAdeMO**
General Characteristics	**400kW+400kW (Air cooling) (Optional)**
Enclosure rating	IP55
Operating altitude	≤2000m
Operating temperature range	-30℃ ~ +55℃
Storage temperature range	-30℃ ~ +80℃
Mounting	Floor Standing
Dimensions (H×W×D)mm	2000 x 728 x 651 (With CMS)
Screen type	7 inch LCD Touch Screen
Cable length	5m
Status indication	LED/LCD/APP
User interface	iocharger APP
Connectivity	Ethernet
Protocols	OCPP 1.6J & OCPP 2.0.1 Full support, GB/T 27930, CHAdeMO 2.0, ISO15118 (PnC & EIM), DIN70121
User authentification	APP, RFID card, QR code, Credit Card (Optional)
Software Update	OTA updates via web portal
Safety standards	**EN IEC 61851-1, EN IEC 61851-23**
Certifications	EN 61000-6 Series, EN IEC 61851-21-2, EN 301 489-1/-3, EN 300 330, EN 62479 RFID

MCS & CCS Dual Liquid-cooling Dispenser

Specification

Specifications are subject to change without notice.

AC Input Voltage	230V ±10% (1P+N+PE)
AC Grid Frequency	50/60Hz
Power grid system	TN/TT
Rated DC Output Power	MCS Connector 1500kW,CCS2 Connector 800kW
Rated DC output current	MCS Connector 1500A,CCS2 Connector 800A
DC Output Voltage	DC 150V-1000V
Cable length	MCS 3.5m, CCS2 5m
Cable Management	Floor Standing
Display	7" LCD Touch Screen
Language	English, French, German, Spanish, Russian, etc.(Customized)
Payment	Mobile APP/ RFID/ POS
Network Connection	4G/Ethernet
Communication Protocol	OCPP 1.6J & OCPP 2.0.1 Full support, GB/T 27930, CHAdeMO 2.0, ISO15118 (PnC & EIM), DIN70121
Operating Temperature	-30°C ~ +50°C
Storage Temperature	-35°C ~ +55°C
Operating Humidity	≤95% Non-Condensing
Altitude	＜2000m
IP Grade	IP55
Noise Grade	≤60dB
Dimensions (H×W×D)mm	2200 x 827 x 750 (With CMS)
Weight	260kG±15
Shell Material	304 SS
Coolling Mode	Liquid Cooling
User authentification	APP, RFID card, QR code, Credit Card (Optional)
Software Update	OTA updates via web portal
Safety standards	EN IEC 61851-1, EN IEC 61851-23
Certifications	EN 61000-6 Series, EN IEC 61851-21-2, EN 301 489-1/-3, EN 300 330, EN 62479 RFID
